

Exact heat. For precise cooking

The Induction Hob heats quicker than other hobs. It boils water faster, and the heat adjustments are so subtle that it helps you produce even the most refined, precise dishes with ease.

Product Benefits & Features

Induction Hob. A cooler surface for a safer kitchen

Our Intelligent Induction Hob technology heats pans and the food in them, but nothing else. The surface around the pan stays cool. So, if you accidentally touch the hob near the pans while you're cooking, your fingers are safe.

SteamBake. The secret to better baking

SteamBake lets you achieve bakery-style results in your own home. Humidity allows dough to rise fully, creating soft insides with rich, crispy crusts. And try it for amazing roasted chicken or flaky fish.

Multilevel Cooking. Cook more at the same time

With Multilevel Cooking, the additional heating ring ensures your dishes are perfectly cooked even when loaded with two trays at the same time.

Expect spotless with a self-cleaning oven

The Catalytic Cleaning feature prevents dirt and grease from building up in the oven. This self-cleaning technology automatically activates when the temperature reaches 250C and removes cooking residue. No scrubbing, just a spotless oven.

The Timer means you never overcook

To assure that your dishes are never overcooked, this oven boasts an electronic Timer that switches the heat off when the set time has been reached.

- Auto-stop anti-tip chrome shelves
- Conventional Cooking
- Grill
- Hob features:
- Cooling Fan
- Catalytic Cleaning
- Top oven energy class: A
- Top oven features include:
